

# FTDI Breakout Board

**Maintainer**[yomin](#)**Date**

2013-03-23

**Status**

finished

**Resources**[https://github.com/Yomin/ftdi\\_breakout](https://github.com/Yomin/ftdi_breakout)**Cost**

~4 Euro

Makes all pins of FT232RL available. Also provides LED at CBUS2 for simple use of eg RxTx activity.

The FT232RL chip is an USB-UART chip to provide serial communication with microcontrollers and even flashing of these (bootloader required).
